

For accelerating Chemical Research!
Workshop Series on Chemical Information Databases

Workshop on

SciFinder

containing all the chemical substances registered by CAS

■ **SciFinder** is an essential tool for chemists, with which they can comprehensively search chemicals and reaction information in addition to papers and patents! A professional instructor will lecture on how to use it.

- Basic Course : For first-time users
 - * Please prepare the own e-mail address of hokudai.ac.jp
- Advanced Course: For those already using
 - * Please prepare the own SciFinder account in advance

■ **How to participate**

- Students, faculty and staff of Hokkaido University can join any venue regardless of the department.
- Please apply in advance from the web because of the limited seating.
